INLEO P

AUTOMATIC DRUM/IBC FILLER CAPPER

60L - 1000L up to 40 drums / hour
10 IBCs / hour

Containers are managed automatically by means of a vision system locating the bung position.

Configurations and options available :

- > Complete enclosure for hazardous and/or corrosive products
- > Available in ATEX for hazardous product
- > Lance cleaning station
 - CIP : Clean In Place
 - COP : Clean Out of Place
- > Conveyor systems and controls
- > Nitrogen

Benefits

- > Labour cost reduction (no human intervention)
- > Minimum product give-away with very high accuracy

Capping system :

- > Brushless capping technology (compatible with ATEX)
- > 2" plastic caps / 2" metal caps / DN150/225 caps (for IBC)
- > 2" metal tab-seals
- > 2" push-on tab-seals

THIS SOLUTION MEET HIGH LEVEL SECURITY REQUIREMENTS

- > Filling zone containment (machine in closed cabinet with fume exhaust system)
- > Protection of the operator (no contact with the product)

CONTAINERS

20L – 200L drums and IBCs

CAPS

Plastic or metal bung
 Plastic or metal cap seals

Explosion proof design
